The Bay Area

Transportation Safety

Ford

RoadCode helps users make smarter safety choices by unlocking driver behavior codes hidden in near misses and perceptions.

University of Central Florida

Real-Time Crash Risk Visualization Tools for Traffic Safety Mgmt. provides real-time crash risk visualizations using integrated tools for traffic safety mgmt.
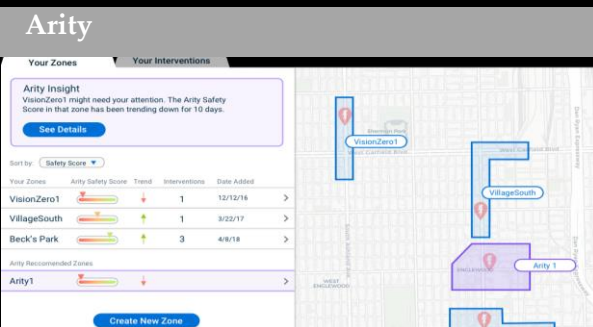

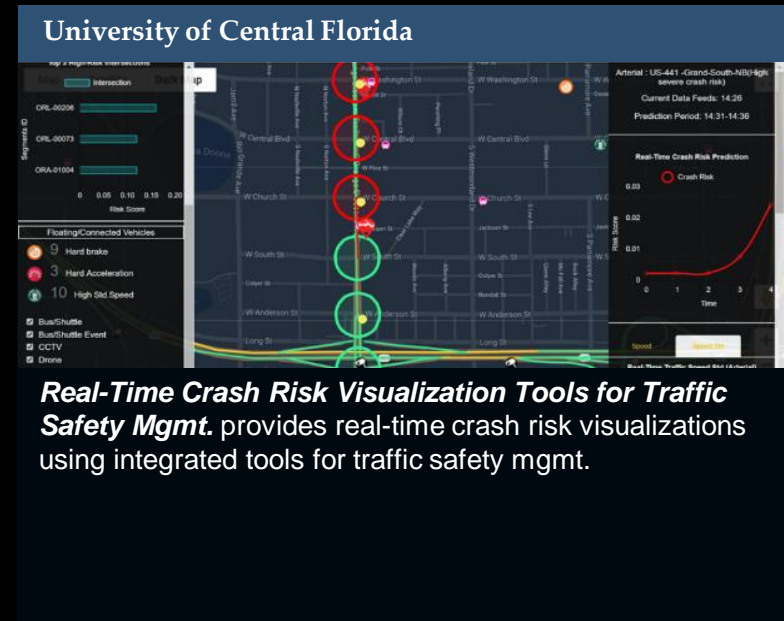

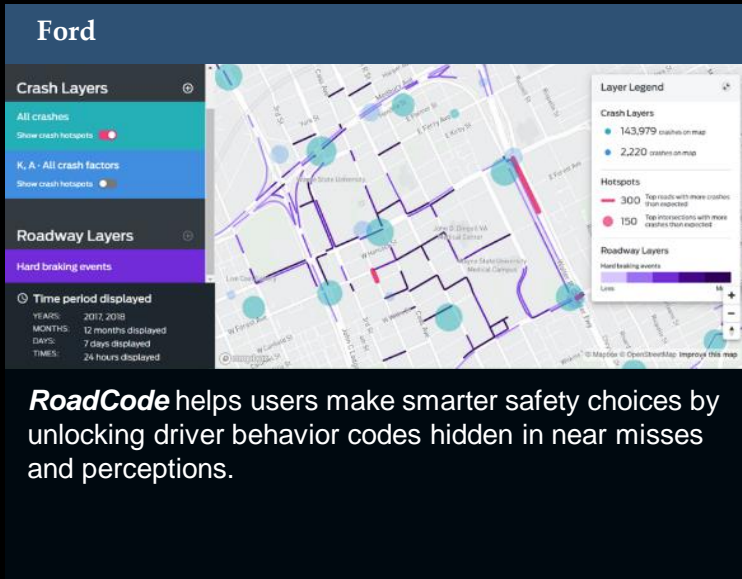

Arity

City Data Platform incorporates Arity's safety-related driving behavior data with other contextual sources to help transportation planners and providers.
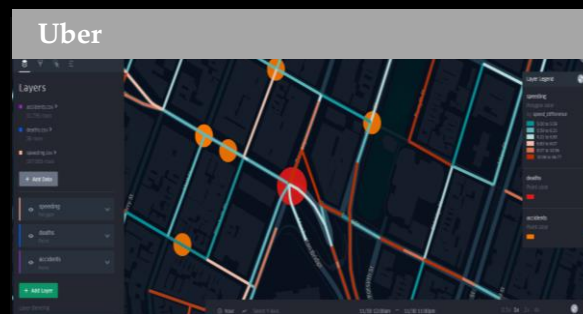

Uber

USDOT Safety with Uber's Kepler.gl combines Kepler.gl, Uber's historical speed data, and publicly available crash data to visualize traffic safety insights.

VHB

My Street is an evidence-based tool that helps decision-makers "see" safety improvements from a pedestrian's perspective.
