Title: 🌐	*Version number in Normative References to OGC documents
Source: 🌐	*PCI Geomatics
Work item code: 🌐	
Category: 🌐	* D (Editorial modification) ⇕

Reason for change: 🌐	*
	The new policy regarding versioning of OGC standard is not clear on how to deal with version number in references to other OGC documents. For example, should a normative reference include the bug version number or just the major and minor version numbers? What version level should be added to the abbreviated references?
Normative reference example:
OGC 07-036, Geography Markup Language (GML) Encoding
Standard, version 3.2.1
or
OGC 07-036, Geography Markup Language (GML) Encoding
Standard, version 3.2
Abbreviated reference example
OGC-GML 3.2.1
or
OGC-GML 3.2

Summary of change:	* Include a sentence in clause 7 stating that "All references including a version number shall omit the bug version number." Modify the example abbreviated reference to GML to: OGC-GML 3.2
Consequences if not approved:	Some level of confusion because references do not match the existing versioning policies for XML Schema and document
Clauses affected:	* 7
