Title: 🔵	*Use XML encoding of GetMap from next WMS version
Source: 🔵	*WMS-1.4 SWG
Work item code: 🔵	
Category: 🔵	* C (Functional modification of feature) ⬍

Reason for change: 🔵	* The next version of the WMS specification (version 2.0) will contain XML formats of its operations. There is no longer a need for the SLD Profile of WMS to define its own XML encoding of GetMap.

Summary of change:	*
	Reformulate section 9.2.3 and let it point to the new WMS specification. This implies that the new version of WMS will also become the base specification of the SLD profile.

Consequences if not approved:	Inconsistency of major OGC specifications.

Clauses affected:	*
	To make use of the XML encoding: Section 9.2.3, Annex C, D.4 and schemas are affected. To make the next WMS become the base specification of the SLD profile changes throughout most sections of the SLD document are required.

Additional Documents affected:
