Title:🔵	*Typos and other minor clarifications
Source:🔵	*Eric Boisvert (Eric.Boisvert[at]RNCan-NRCan.gc.ca
Work item code:🔵	
Category:🔵	* [D (Editorial modification) ▼]

Reason for change:🔵	* To fix minor typos and make some small clarifications.
Summary of change:🔵	* On page 61, Example C.4 about schema-element() It reads: "In this case, the WFS shall consider the property streetName of all subtypes of Address, ie. USAdress, EUAddress, AUAdress". I suggest adding "and Address itself" (6.3.3.1.5 makes it clear) There are also a couple of typos in the example in C.2. There's two occurrences of "<spouce>" instead of "<spouse>" and the Person instance example on p.59 has a closing "</Person>>" (two '>' brackets)

Consequences if not approved: ❓	
Clauses affected: ❓	* Example C.2, Example C.4, 6.3.3.1.5
