**Title:** *Addendum to CR 09-109 (Web Processing Service Change Request – methods for controlling, and checking the status of asynchronous process)*

**Source:** *Astrium Geo-Information Services*

**Work item code:**

**Category:** *D (Editorial modification)*

**Reason for change:**

In current version of CR09-109, the process identifier URN, required to manage an asynchronous process, is returned by using the statusLocation attribute of a ResponseDocument. Consequently the previous statusLocation definition from WPS 1.0.0 is no more supported.

**Summary of change:**

Proposal of changes could be summarized as: adding a ProcessInstanceId attribute in the ResponseDocument. Additional updates are proposed to enhance integration of asynchronous mode within the existing execute operation.

**Consequences if not approved:**

WPS 1.0.0 backward compatibility broken on ExecuteResponse – see WPS 1.0, section 10.1, Fig 2.

**Clauses affected:**

WPS 1.0 document
- Section 9.3.1 - table 16
- Section 10.2 - table 39
- Section 10.3 - table 54

CR 09-109 document
