Title: ⓘ	*Allow use of http URIs to identify CRS
Source: ⓘ	*TC Policy
Work item code: ⓘ	
Category: ⓘ	* B (Addition of feature) ⬍

Reason for change: ⓘ	* The WFS 2.0 spec requires that coordinate reference systems referred to in WFS interactions be identified by OGC URNs. Current OGC policy is to _allow_ URNs, but to _recommend_ http URIs (URLs).
Summary of change: ⓘ	* Modify the relevant clauses to allow http URIs with the pattern http://www.opengis.net/def/crs/[epsg|ogc]/0/{code} for identification of CRSs. The XML schemas do not need changing, as the relevant references are to xs:anyURI

Consequences if not approved:	Bad CITE tests which penalize implementations that conform to current OGC Policy concerning identifiers.

Clauses affected:	*
	7.9.2.4.4 Also 7.9.3.6 and 8.3.5.2 for other parameters.

Additional Documents affected:
