Title: ⓘ	*[FES] The matchAction parameter should exist on more than the comparison ops.
Source: ⓘ	*johannes.echterhoff@igsi.eu
Work item code: ⓘ	
Category: ⓘ	* C (Functional modification of feature) ⌵
Reason for change: ⓘ	* Today I was involved in a discussion related to filtering with FES 2.0 and one issue there was that the matchAction is only available in comparisonOperators (but not all of them, e.g. propertyIsBetween) - it should be available in other applicable operators as well (temporal/spatial). Not sure if this is already covered through CRs - it should be because this looks like a bug to me.
Summary of change: ⓘ	* Review and update other non-comparison operators to see if the

	matchAction parameter may be applied to them (e.g. propertyIsBetween).
Consequences if not approved: ?	
Clauses affected: ?	* 7.7.1, 7.7.2 and any clause that describe an operator to which the matchAction parameter will be added.
Additional Documents affected: ?
