Title:	*Dashed line style
Source:	*Frederic Morin, Stefan Strobel, ML Vautier
Work item code:	
Category:	* B (Addition of feature)
<hr/>	
Reason for change:	* DGIWG S15 project investigated the use of KML for the military community. One topic was to use KML to portray command and control data according to the MIL-STD-2525B common warfighting symbology. A number of styling requirements were identified as a result, with support for a dashed line style being one of the most critical. The solution proposed for dashed lines in this CR was implemented in one Canadian forces system using OpenLayers.
Summary of change:	* Addition of an XML element "style" to KML LineStyle, of type enumeration, including "dash" value.
Consequences if not approved:	Inability to use KML to represent MIL-STD-2525B planned/anticipated tactical graphics
