Title:	*Polygon fill styles
Source:	*Frederic Morin, Stefan Strobel, ML Vautier
Work item code:	
Category:	* B (Addition of feature)
Reason for change:	* DGIWG S15 project investigated the use of KML for the military community. One topic was to use KML to portray command and control data according to the MIL-STD-2525B common warfighting symbology. A number of styling requirements were identified as a result, including enhancement to polygon fill styles. The solution proposed for these fill styles was implemented in one Canadian forces system using OpenLayers.
Summary of change:	* Add a new fillStyle element (enumeration) on KML PolyStyle, with values 'circle' and 'dash'.
Consequences if not approved:	Inability to represent multiple polygon symbols as described by the 2525B symbology.
Clauses affected:	* 12.12
