Title:	*
	[WPS 2.0] Specify largest possible data volume separately for each format
Source: 1	*Matthias Mueller, Benjamin Pross
Work item code:	
Category:	* C (Functional modification of feature)
Reason for change:	*  In WPS 1.0 MaximumMegabytes is defined simultaneously for all supported formats of an input data item. In many cases it would be useful to have the maximum data volume specified separately for each format.
Summary of change:	*  Define MaximumMegabytes separately for each supported input format.
