Title: 🔵	* [CAT3.0 SWG] Inconsistent Manager interface definition– harvestRecords vs ha
Source: 🔵	*Kevin Gupton, ARL:UT
Work item code: 🔵	
Category: 🔵	* F (Critical correction) ⬍

Reason for change: 🔵	* The Manager component of a Catalogue Service is defined inconsistently. Section 7.2.1 defines Manager has having operations transaction() and harvestRecords. This term is repeated in Table 50 and in section 1.12.1. However, other sections use the term "harvestResource"- see 7.2.6.1, 7.2.6.3, Figure 15, and Tables 39, 40, 41.
Summary of change: 🔵	* Fix consistency to what is intended: harvestRecords or harvestResource? Also, clarify whether this operation is to retrieve the referent datasets or the metadata records--this is ambiguous in the definitions.

Consequences if not approved: 🔵	Consistent implementation of record/resource harvesting will be compromised.
Clauses affected: 🔵	* Sections 1.12.1, 7.2.1, 7.2.6.1, 7.2.6.3, Figure 15, and Tables 39, 40, 41.
Additional Documents affected: 🔵	unclear
