<b>Title:</b>	* [OWS Common 2.0] Remove requirement that the Operations Metadata section
<b>Source:</b>	*OWS 10
<b>Work item code:</b>	
<b>Category:</b>	* C (Functional modification of feature)
<b>Reason for change:</b>	* OGC 06-121r9 did not anticipate that an OGC service could be defined with only the GetCapabilities operation. However, in the OWS-10 service integration thread a service, called a Web Integration Service, has been defined that only has one operation -- the GetCapabilities operation. This operation generates a standard OGC capabilities document and the content section contains a list of other related OGC services. See the OWS-10 Service Integration Engineering report (OGC 14-013) for more details.
<b>Summary of change:</b>	* Change the minimum cardinality of the Operation element from 2 to 1.
<b>Consequences if not approved:</b>	
<b>Clauses affected:</b>	* 7.4.6 (but the change would need to be cascaded through the document and the OWS common schemas).
<b>Additional Documents affected:</b>
