Title:	* [WFS/FES SWG] Consistency in the returned collection class
Source:	*Envitia for OWS-10
Work item code:	
Category:	* C (Functional modification of feature)
Reason for change:	* The WFS-G BP specifies that the top level container should be an iso19112:SI_Collection element but then gives an example that uses a wfs:FeatureCollection element.
Summary of change:	* Constrain the WFS-G Response to only providing wfs:FeatureCollection as the top-level container
Consequences if not approved:	It may lead to exceptions if clients do not know what top-level container (root element) to expect.
Clauses affected:	* Pages 24, 29, 38
Additional Documents affected:
